Agentic Hackathon human in the loop

200 high school and university students from western Romania spend a weekend building AI agents that keep a person in control. We propose Nokia as the Title Partner.

Sponsorship packages

05

Plan and next step

200

participants
140 high school, 60 university

100

teams of two
bring your own laptop

44h

Friday 17:00 to
Sunday 16:00

€25,000

proposed Title Partner
package for Nokia

ORGANIZERS

agentic.tm • UPT • UVT

DATE

Friday 27 to Sunday 29 November
2026

VENUE

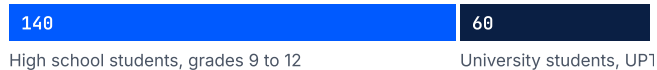

UPT, Faculty of Automation and
Computers, Bd. Vasile Parvan 2,
Timisoara

Two days with 200 of the region's strongest young programmers

Human in the loop

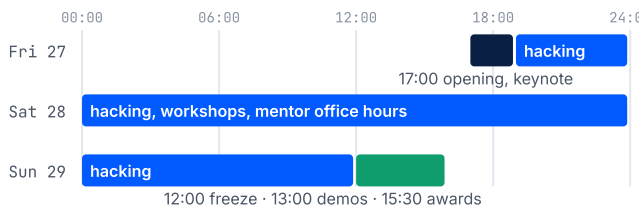

Teams build agents that reason, plan and act, with a person approving the steps that matter. The agent proposes, the human decides. Cursor with frontier models, any stack, a working demo by Sunday noon.

Who is in the room

From Timis, Arad, Caras-Severin and Hunedoara. Free to enter. Minors come with parental consent and a teacher per school group. Two judging tracks, so a 15-year-old is not scored against a third-year student.

The weekend

Organizers and partners

agentictm, Timisoara's agentic AI community, runs the program and brings mentors and sponsors. UPT hosts and houses the participants; UPT and UVT feed them and add faculty mentors and judges. SpaceXAI has confirmed sponsorship.

What the Title Partner gets

Powered by Nokia

naming on site, stage, T-shirts, badges, every post

20 min keynote

Friday opening, all participants and teachers

Nokia Challenge

your problem, your judges, your award

5 mentors

Nokia engineers at the tables both days

2 jury seats

plus the challenge track jury

Recruiting

table at the venue, opt-in CV book

Report

video, photos, numbers, projects, in two weeks

Meetup talk

a Nokia slot at agentictm

Why Nokia Timisoara. About 1,300 people on campus, 600 of them R&D engineers, hired mostly from UPT. The 140 high school students here are the UPT intake of 2027 to 2029; the 60 university students are hires of 2027.

Nokia Challenge: pick one brief

Incident triage with approval

An agent reads alarms and logs from a simulated network, proposes a diagnosis and a fix, and waits for an engineer to approve.

Configuration review

An agent reviews a proposed change, explains the risk in plain language, and asks the one question that decides it.

Nothing runs on Nokia infrastructure: laptops and the providers' APIs only.

Where the money goes: €25,000

Two lines, both in front of every participant: the developer tooling each team builds with, and the prizes. Everything else comes from the universities, agentic.tm and the other sponsors.

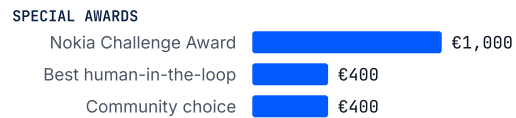

CASH LINE	EUR
Developer tooling credits	€17,200
\$20,000, detailed on page 4	
Prize pool	€7,800
Two tracks plus three special awards	
Total, the Title Partner package	€25,000

Credits per team

\$200 per team of two, 100 teams. The split and the funding scenarios are on page 4.

Prize pool: €7,800, per team of two

High school winners get vouchers, which avoids tax and guardianship paperwork for minors. Nokia's judges hand out the Nokia Challenge Award.

Covered by the partners

Venue

UPT, Faculty of Automation and Computers

Food and drinks

UPT and UVT, six meals plus coffee, water, snacks for 230 people

Accommodation

UPT dorms for out-of-town participants

Design and mentoring

agentic.tm, 10 mentors, identity, site, media

Swag, print, photo and video

agentic.tm with Gold and Silver sponsors

\$100 per participant: what it buys, and who pays it

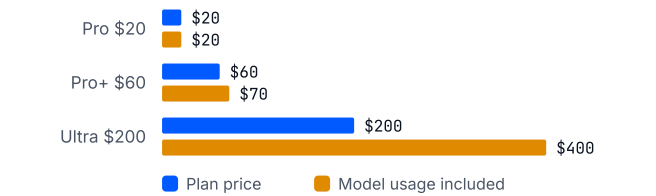

The split

Cursor seat, one month	\$40 / person
Frontier model usage	\$50 / person
Sunday reserve	\$10 / person

COMPONENT	EACH	× 200
Cursor seat, one month	\$40	\$8,000
One workspace owned by the organizers. Central billing, spend limit per seat, no card from any student.		
Frontier model usage	\$50	\$10,000
Claude, GPT and Gemini calls through Cursor or a team API key behind a gateway. This is the pool that empties on a hackathon weekend.		
Sunday reserve	\$10	\$2,000
Released on Sunday morning to teams close to their cap. Unused reserve is not spent.		
Total	\$100	\$20,000

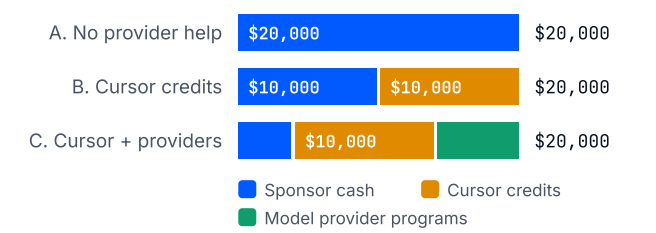

Why \$100: an agent burns usage, a chatbot does not

One task becomes dozens of model calls, each carrying the whole codebase context. A team on a frontier model spends \$50 to \$150 over a weekend at list prices. Cursor's own plans show the scale:

With no credits, teams still build on the providers' free tiers. Credits put frontier models and an agentic coding tool in their hands.

Who pays it: three scenarios

ASSUMPTION	CASH
A Every credit bought at list price. The budget is priced on this.	\$20,000
B Cursor's hackathon program grants \$50 per participant, as at its Boston event in May 2026. Application in; answer expected in weeks.	\$10,000
C B plus \$6,000 from Anthropic, OpenAI or Mistral programs, which gave \$25 to \$50 per participant at comparable events.	\$4,000

For Nokia: any credits granted reduce the cash on this line one for one, and the final split is in the post-event report. Nokia's package does not grow if the applications fail.

How credits reach the teams

- One Cursor Teams workspace owned by the organizers: a seat per participant, a spend cap per seat, no card from any student.
- Cursor's own licences at Nokia stay out of it; cloud agents are restricted on Nokia's network.

Three tiers. We propose the first one for Nokia.

Title Partner

PROPOSED FOR NOKIA

€25,000

One slot. Credits €17,200 + prize pool €7,800: the two lines every participant sees.

- "Powered by Nokia" naming
- 20-minute opening keynote
- Nokia Challenge track and award
- Five mentors, two jury seats
- Logo on T-shirts, badges, stage, site
- Recruiting table, opt-in CV book
- Video, photos, written report
- Talk at an agentic.tm meetup

Gold

€5,000

One slot. Swag, print, photo and video, on top of the Title package.

- 30-minute Saturday workshop
- Two mentors, one jury seat
- Logo on site, stage, T-shirts
- Recruiting table
- Report and photo set

Silver

€2,500

Open. Cash or services: print, prize hardware, media.

- Logo on site and stage
- Mention at opening and closing
- Swag in the participant bag

How the budget closes

Nokia's €25,000 is the whole cash budget: credits and prizes. Gold and Silver sponsors add swag, print, photo and video on top, outside this budget.

SPACEX

Confirmed sponsor. Package being finalized, not yet counted above. Whatever it and the credit programs bring lowers the credits line and is reported back to Nokia.

The decision we ask of Nokia: Title Partner at €25,000, confirmed by 15 October 2026, and one Nokia Challenge brief. Then a one-page agreement and two invoices: €12,500 on signing in October, €12,500 in December with the report.

From today to the event

Milestones

WHEN	WHAT
15 Oct	Nokia confirms the Title package and the challenge brief; agreement signed
20 Oct	Site live, registration open, school announcements go out
10 Nov	10 mentors briefed, Nokia Challenge brief final
13 Nov	Registration closes, seats and credits provisioned, tooling tested
27-29 Nov	The event, UPT, Faculty of Automation and Computers, Bd. Vasile Parvan 2, Timisoara
11 Dec	Report, video and showcase to sponsors and press; second invoice

Risks

RISK	RESPONSE
No provider grants credits	The budget already assumes it. Free tiers keep every team building.
Venue falls through	UVT's campus, same weekend. No sponsor money is spent before the booking is signed.
Minors and accounts	Organizers create every seat; no student signs a contract or enters a card. Consent forms, a teacher per school group, medical assistance on site.
Fewer participants	Credits scale with headcount; unspent money is reported and returned.

Next step: Nokia confirms the Title Partner package (€25,000) and picks one Nokia Challenge brief by 15 October 2026. We send the one-page agreement the same week.
