Agentic Programming Hackathon human in the loop

200 high school and university students from western Romania spend a weekend building AI agents that keep a person in control. We propose Nokia as the Title Partner.

01	02	03	04	05
The event and what Nokia gets	Budget: cash and in kind	The \$20,000 credits line	Sponsorship packages	Plan, risks, next steps

200

participants
140 high school, 60
university

100

teams of two
bring your own laptop

Friday 17:00 to
Sunday 16:00

€25,000

proposed Title Partner
package for Nokia

ORGANIZERS

agentic.tm · Politehnica University of
Timisoara · West University of
Timisoara

DATE

Friday 27 to Sunday 29 November
2026

VENUE

UPT, Faculty of Automation and
Computers, Bd. Vasile Parvan 2,
Timisoara. Meals, drinks and dorm
rooms provided by UPT and UVT.

Two days with 200 of the region's strongest young programmers

Human in the loop

Students build AI agents that reason, plan and act, with a person guiding, approving or correcting them at the points that matter. The agent proposes, the human decides. That is how the agent systems that work in production are built: a coding agent that opens a pull request for review, a network agent that proposes a change and waits for an engineer to approve it.

Teams get Cursor with frontier models and API access, choose their own stack, and ship a working demo by Sunday noon. No fixed problem list. A Nokia Challenge track for teams that want a problem from Nokia's world.

Who participates

GROUP	PEOPLE	FROM
High school, grades 9 to 12	140	Timis, Arad, Caras-Severin, Hunedoara, through school inspectorates and the universities' school partnerships
University students	60	UPT and UVT, bachelor's and master's
Total	200	100 teams of 2, two judging tracks

Participation is free. Minors bring a signed parental consent and an accompanying teacher per school group. High school and university teams are judged separately.

The weekend

Fri 27 Nov	17:00 check-in, opening, Nokia keynote, theme briefing. Hacking starts 19:00
Sat 28 Nov	Hacking all day. Mentor office hours, two short workshops, Nokia Challenge briefing
Sun 29 Nov	12:00 code freeze. Demos from 13:00 in two rooms, one per track. 15:30 awards, closing, group photo

Organizers

agentic.tm is Timisoara's agentic AI community: 250 members on Discord, 500+ on LinkedIn, monthly meetups since October 2025. It brings the program, the mentors and the sponsors. **UPT** hosts the event at the Faculty of Automation and Computers on Bd. Vasile Parvan and houses out-of-town students in its dorms. **UPT** and **UVT** together cover food and drinks for the whole weekend and provide faculty mentors and judges.

What the Title Partner gets

BENEFIT	DETAIL
Naming	"Powered by Nokia" on the site, registration page, stage backdrop, T-shirts, badges, every post and press release
Keynote	20 minutes at Friday's opening, in front of every participant and teacher
Challenge track	A Nokia-defined problem, Nokia judges, the Nokia Challenge Award
Mentors	Up to five Nokia engineers on the mentor roster, with Nokia badges
Jury	Two seats on the main jury plus the challenge track jury
Recruiting	Opt-in CV book of participants over 18, a Nokia table at the venue both days
Report	Recap video, photo set, written report with numbers and projects, within two weeks
Community	A Nokia talk at an agentic.tm meetup before or after the event

Why this fits Nokia Timisoara. The campus employs about 1,300 people, roughly 600 of them R&D engineers, and hires mostly from UPT. The 140 high school students in the room are the UPT intake of 2027 to 2029. The 60 university students are hires of 2027.

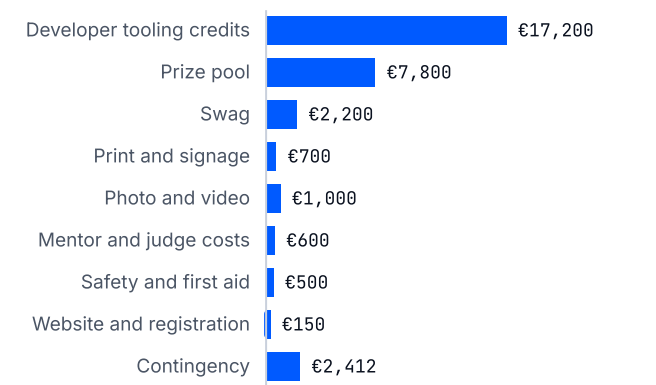

Nokia Challenge track: Nokia picks one of these two briefs

- Incident triage with approval.** An agent reads alarms and logs from a simulated network, proposes a diagnosis and a fix, and waits for an engineer to approve before acting.
- Configuration review.** An agent reviews a proposed configuration change, explains the risk in plain language, and asks the human the one question that decides it.

Nothing runs on Nokia infrastructure. Tooling runs on participants' laptops against the providers' APIs, so Nokia's internal restrictions on cloud agents do not touch the event.

Where the money goes: €32,562 in cash, €35,320 in kind

UPT and UVT cover the venue, the beds, the food and the drinks. agentic.tm covers design and mentoring. Sponsors cover what has to be bought: tooling credits, prizes, and the small lines.

CASH LINE	EUR
Developer tooling credits	€17,200
\$20,000 at 0.86 EUR/USD, page 4	
Prize pool	€7,800
Two tracks plus three special awards	
Swag	€2,200
T-shirts 240 × €7, lanyards and badges, stickers	
Print and signage	€700
Four roll-ups, stage banner, posters, room signs	
Photo and video	€1,000
Photographer both days, one edited recap video	
Mentor and judge costs	€600
Travel for out-of-town mentors, thank-you gifts	
Safety and first aid	€500
Medical assistance on site, consent forms for minors	
Website and registration	€150
Domain, hosting, registration and submissions	
Subtotal	€30,150
Contingency 8% price changes, no-shows, unspent is reported back	€2,412
Total cash	€32,562

Covered in kind by the partners: €35,320

CONTRIBUTION	FROM	VALUE
Venue: amphitheatre, labs, network	UPT	€4,500
Food and drinks, six meals plus coffee, water, snacks	UPT / UVT	€14,720
Dorm rooms for out-of-town participants	UPT	€3,600
Identity, site, media graphics	agentic.tm	€2,500
Mentoring, 10 mentors, two days	agentic.tm, UPT, UVT	€10,000
Total in kind		€35,320

Food is 230 people (200 participants, 10 mentors, 6 judges, 14 staff) at €64 each: two breakfasts, two lunches, two dinners, plus coffee, water and snacks. Values are what the organizers would otherwise pay for the same thing.

Prize pool

TRACK	AWARDS	EUR
High school track	1st €1,500, 2nd €1,000, 3rd €500	€3,000
University track	1st €1,500, 2nd €1,000, 3rd €500	€3,000
Special awards	Nokia Challenge Award €1,000, Best human-in-the-loop design €400, Community choice €400	€1,800
Total		€7,800

Per team of two. High school winners receive vouchers rather than cash, which avoids tax and guardianship paperwork for minors. Nokia's judges hand out the Nokia Challenge Award.

Rate 0.86 EUR per USD, mid-September 2026. Print and swag are Timisoara supplier estimates; final quotes follow.

\$100 per participant: what it buys, and who pays it

The split

Cursor seat, one month	\$40 / person
Frontier model usage	\$50 / person
Sunday reserve	\$10 / person

COMPONENT	EACH	× 200
Cursor seat, one month	\$40	\$8,000
One workspace owned by the organizers. Central billing, spend limit per seat, no card from any student.		
Frontier model usage	\$50	\$10,000
Claude, GPT and Gemini calls through Cursor or a team API key behind a gateway. This is the pool that empties on a hackathon weekend.		
Sunday reserve	\$10	\$2,000
Released on Sunday morning to teams close to their cap. Unused reserve is not spent.		
Total	\$100	\$20,000

Why \$100 and not \$10

A chat app that calls a model once per message costs cents. An agent turns one task into dozens of model calls, each carrying the whole context of the code so far. A team using a frontier model in an agentic coding tool for two days burns through \$50 to \$150 of usage at list prices. Cursor's own plans show the scale: the \$20 plan includes \$20 of model usage, the \$60 plan \$70, the \$200 plan \$400. We size the pool so a team does not run dry on Saturday evening, and keep a reserve instead of giving everyone the maximum.

With no credits at all, every team can still build on the providers' free tiers (Gemini, Mistral, Groq, GitHub Models). The credits are what put frontier models and an agentic coding tool in their hands.

Who pays it: three scenarios

A. No provider help	\$20,000	\$20,000
B. Cursor credits	\$10,000 \$10,000	\$20,000
C. Cursor + providers	\$10,000	\$20,000

Sponsor cash

Cursor credits

Model provider programs

SCENARIO	ASSUMPTION	CASH
A	Every credit bought at list price. The base case; the whole budget is priced on it.	\$20,000 €17,200
B	Cursor's hackathon program grants \$50 per participant, what it gave at its Boston Tech Week hackathon in May 2026. Application submitted; their stated answer time is "the next few weeks".	\$10,000 €8,600
C	B plus \$6,000 from Anthropic, OpenAI or Mistral programs, which gave \$25 to \$50 per participant at comparable events. Mistral request pending; the others go in once the date is locked.	\$4,000 €3,440

What this means for Nokia. Any credits granted by Cursor or a model provider reduce the cash Nokia spends on this line, one for one, and the final split is in the post-event report. Nokia's package does not grow if the applications fail.

What Cursor can and cannot do

- Cursor grants credits to hackathons "that meet our criteria", case by case. No published amount; recent events got \$50 per participant, or prize credits of \$500 to \$3,500.
- Cursor's free year for students closed to new sign-ups in June 2026. Cursor does not sponsor food, prizes or venues.
- Nokia's own Cursor licences stay out of it: cloud agent features are restricted on Nokia's network. The event runs its own workspace.

Three tiers. We propose the first one for Nokia.

Title Partner

PROPOSED FOR NOKIA

€25,000

One slot. Funds the developer tooling credits (€17,200) and the prize pool (€7,800): the two lines that carry a sponsor's name in front of every participant.

- "Powered by Nokia" naming everywhere
- 20-minute opening keynote
- Nokia Challenge track and award
- Up to five mentors, two jury seats
- Logo on T-shirts, badges, stage, site
- Recruiting table, opt-in CV book
- Recap video, photos, written report
- Talk slot at an agentic.tm meetup

Gold

€8,000

One slot. Funds everything the Title package does not: swag, print, photo and video, safety, the website, and the contingency.

- 30-minute workshop on Saturday
- Two mentors, one jury seat
- Logo on site, stage, T-shirts
- Recruiting table
- Named in press and social posts
- Report and photo set

Silver

€2,500

No limit on slots. Cash or in kind: a print shop, a hardware vendor for prizes, a media partner.

- Logo on site and stage
- Mention at opening and closing
- Swag in the participant bag
- Social media mention

How the budget closes

Nokia's €25,000 covers 77% of the cash budget. One Gold sponsor covers the remaining €7,562; that conversation runs in parallel with this one. Any credit program approval lowers the credits line and is reported back to Nokia as surplus.

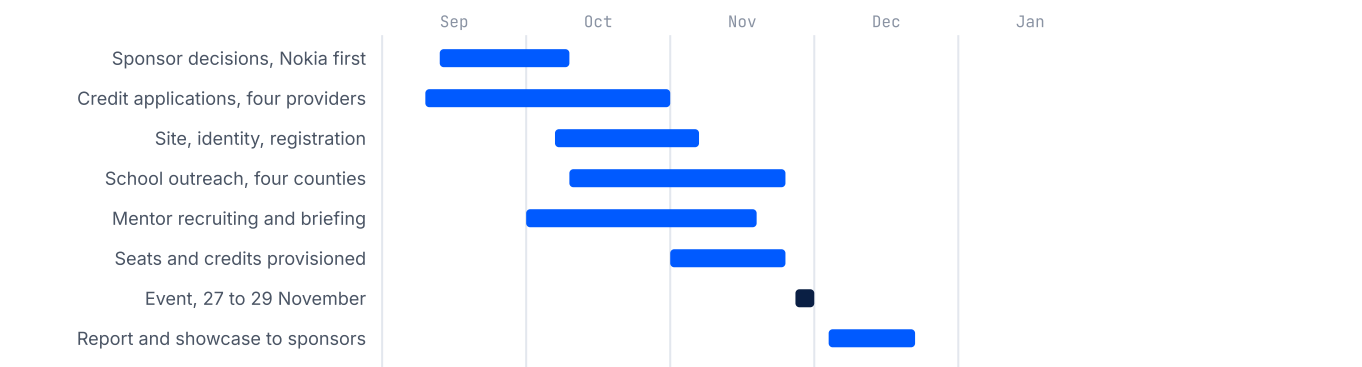

The decision we ask of Nokia: Title Partner at €25,000, confirmed by 15 October 2026. On a yes, a one-page agreement lists the benefits above, the amount and the reporting. Two invoices from the organizing entity: €12,500 on signing in October, €12,500 in December with the report.

What each contribution covers

WHO	COVERS	EUR
Nokia, Title Partner	Developer tooling credits €17,200 and the prize pool €7,800	€25,000
Gold sponsor	Swag, print, photo and video, mentor and judge costs, safety, website, contingency	€7,562
UPT and UVT, in kind	Venue, food and drinks, dorm rooms	€22,820
agentic.tm, in kind	Identity, site, media graphics, mentoring	€12,500

From today to the event

The event is on Friday 27 to Sunday 29 November 2026 at UPT, Faculty of Automation and Computers, Bd. Vasile Parvan 2, Timisoara. Sponsor decisions come first, because the sponsor's name goes on the site and the school announcements when they launch on 20 October.

Milestones

WHEN	WHAT
by 20 Sep	This proposal reviewed with Nokia
by 10 Oct	Cursor and Mistral answers on credits; Anthropic and OpenAI applications in
by 15 Oct	Nokia confirms the Title package and picks the challenge brief; agreement signed
by 20 Oct	Site live, registration open, first school announcements
by 10 Nov	10 mentors briefed; Nokia Challenge brief final
13 Nov	Registration closes, consent forms in, seats and credits provisioned, tooling tested end to end
27-29 Nov	The event
by 11 Dec	Report, video and project showcase to sponsors and press; second invoice

Risks and what we do about them

RISK	RESPONSE
No provider grants credits	The budget assumes exactly that. Any grant is upside. The providers' free tiers guarantee every team can build.
Venue falls through	UVT's campus is the backup, same weekend. Sponsor money is not spent before the venue booking is signed.
Minors and accounts	Seats are created by the organizers, so no student signs a contract or enters a card. Parental consent covers participation and photos. Teacher per school group, medical assistance on site.
Fewer participants	Swag and credits scale with headcount. Unspent money is reported and returned or rolled into prizes, as the sponsor prefers.
Teams run out of credits	Per-seat caps stop one team draining the pool. The reserve covers Sunday. Free tiers are the fallback.

Next step: Nokia confirms the Title Partner package (€25,000) and picks one Nokia Challenge brief by 15 October 2026. We send the one-page agreement the same week.
