DATE

27-29 November 2026

VENUE

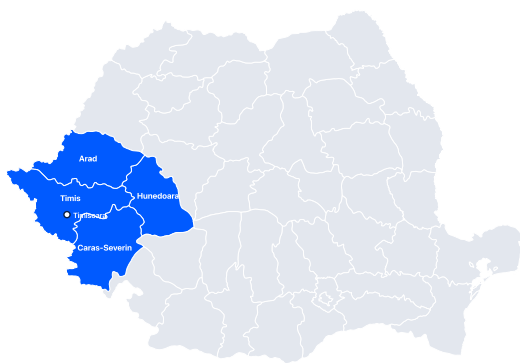

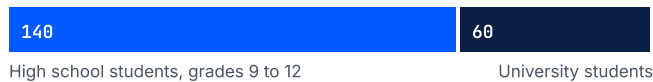

UPT, Faculty of Automation and
Computers, Bd. Vasile Parvan 2,
Timisoara

Two days with 200 of the region's strongest young programmers

Human in the loop

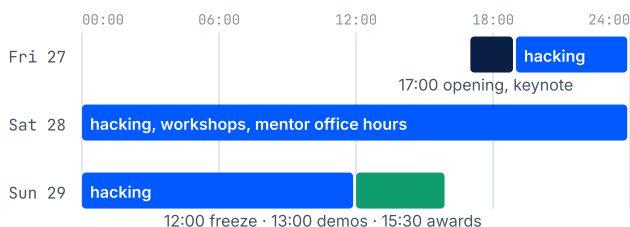

Teams build agents that reason, plan and act, with a person approving the steps that matter. The agent proposes, the human decides. Cursor with frontier models, any stack, a working demo by Sunday noon.

Who is in the room

Four counties: Timis, Arad, Caras-Severin, Hunedoara. Free to enter. Minors come with parental consent and a teacher per school group. Two judging tracks, so a 15-year-old is not scored against a third-year student.

The weekend

Nokia Challenge: 100 teams on a Nokia problem, one weekend

The on-call co-pilot

Alarms and logs stream in from a simulated 5G network. The agent triages, finds the likely cause, drafts the fix, and the engineer approves it with one click. What Nokia's operations centre in Timisoara does by hand today, with a human still holding the pen.

Ask the network

An engineer types "why is this cell degraded since 3 am?" The agent works through telemetry and configuration, answers with evidence, and proposes a change that waits for sign-off. A plain-language front end to network data.

Nokia writes the brief

and the simulated data; we build the starter kit

Nokia judges it

and hands out the Nokia Challenge Award

Nokia keeps the results

prototypes, write-ups, and a shortlist of the teams to recruit

Nothing runs on Nokia infrastructure: participants' laptops and the providers' APIs only.

What the Title Partner gets

Powered by Nokia

naming on site, stage, T-shirts, badges, every post

20 min keynote

Friday opening, all participants and teachers

Nokia Challenge

your problem, your judges, your award

5 mentors

Nokia engineers at the tables both days

2 jury seats

plus the challenge track jury

Recruiting

table at the venue, opt-in CV book

Report

video, photos, numbers, projects, in two weeks

Meetup talk

a Nokia slot at agentic.tm

Why Nokia Timisoara. About 1,300 people on campus, 600 of them R&D engineers, hired mostly from UPT. The 140 high school students here are the UPT intake of 2027 to 2029; the 60 university students are hires of 2027.

Where the money goes: \$15,000

Two lines, both in front of every participant: the developer tooling each team builds with, and the prizes. Everything else comes from the universities, agentcic.tm and the other sponsors.

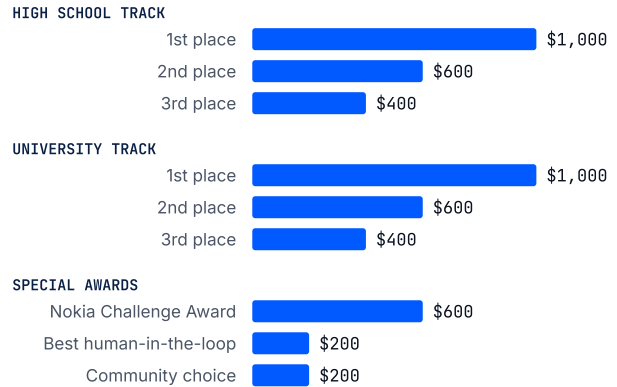

CASH LINE	USD
Developer tooling credits	\$10,000
Cursor seats plus reserve, detailed on page 4	
Prize pool	\$5,000
Two tracks plus three special awards	
Total, the Title Partner package	\$15,000

Credits: \$10,000

One Cursor Teams seat per participant for the event month, plus a pooled reserve. Details and funding scenarios on page 4.

Prize pool: \$5,000, per team of two

High school winners get vouchers, which avoids tax and guardianship paperwork for minors. Nokia's judges hand out the Nokia Challenge Award.

Per participant

\$75

of sponsor money per participant

\$40

Cursor seat each, plus the shared reserve

9

awards across two tracks

Covered by the partners, outside this budget

Venue

UPT, Faculty of Automation and Computers

Food and drinks

UPT and UVT, six meals plus coffee, water, snacks for 230 people

Accommodation

UPT dorms for out-of-town participants

Design and mentoring

agentcic.tm, 10 mentors, identity, site, media

Swag, print, photo and video

agentcic.tm with Gold and Silver sponsors

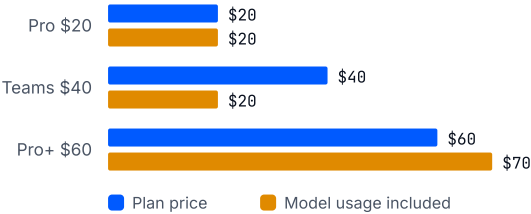

A \$40 Cursor seat per participant, plus a \$2,000 reserve

What it buys

COMPONENT	BASIS	USD
Cursor Teams seat, one month Unlimited Auto mode plus about \$20 of Claude, GPT or Gemini usage per seat. One workspace owned by the organizers, spend cap per seat, no card from any student.	\$40 × 200	\$8,000
Central reserve Top-ups on request for teams that hit their frontier-model cap. Unused reserve is not spent.	pooled	\$2,000
Total		\$10,000

Why a seat is enough

Auto mode on a paid Cursor seat is unlimited, so no team is ever stopped. What runs out is the frontier-model pool, about \$20 per seat, which an agent on Claude or GPT burns in a day of heavy use. The reserve tops up the teams that get there. Comparable events give \$25 to \$50 per participant; Cursor's own Boston hackathons in 2026 gave \$50.

Cursor plan price against the third-party model usage each includes. Auto mode sits outside these pools.

Credits timeline

13 Nov Seats created for every registered participant, spend caps set	20 Nov Every team logs in and runs the starter kit end to end	27-29 Nov Hacking. Reserve top-ups on request, Saturday evening and Sunday morning	11 Dec Usage report to Nokia: seats used, reserve spent, unused returned
---	---	--	--

Who pays it: three scenarios

A. No provider help	\$10,000	\$10,000
B. Cursor grants \$25 each	\$5,000	\$5,000
C. Cursor grants \$50 each	\$10,000	\$10,000

Sponsor cash

Cursor credits

ASSUMPTION	CASH
A Every seat bought at list price. The budget is priced on this.	\$10,000
B Cursor's hackathon program grants \$25 per participant. Application in.	\$5,000
C Cursor grants \$50 per participant, as at its Boston events in 2026.	\$0

How credits reach the teams

- One Cursor Teams workspace owned by the organizers: a seat per participant, a spend cap per seat, no card from any student.
- Reserve top-ups are released by the organizers on Saturday evening and Sunday morning, on request.
- Cursor's own licences at Nokia stay out of it; cloud agents are restricted on Nokia's network.

For Nokia: any credits granted reduce the cash on this line one for one, and the final split is in the post-event report. Nokia's package does not grow if the application fails.

Three tiers. We propose the first one for Nokia.

Title Partner

PROPOSED FOR NOKIA

\$15,000

One slot. Credits \$10,000 + prize pool \$5,000: the two lines every participant sees.

- "Powered by Nokia" naming
- 20-minute opening keynote
- Nokia Challenge track and award
- Five mentors, two jury seats
- Logo on T-shirts, badges, stage, site
- Recruiting table, opt-in CV book
- Video, photos, written report
- Talk at an agentic.tm meetup

Gold

\$5,000

One slot. Swag, print, photo and video, on top of the Title package.

- 30-minute Saturday workshop
- Two mentors, one jury seat
- Logo on site, stage, T-shirts
- Recruiting table
- Report and photo set

Silver

\$2,500

Open. Cash or services: print, prize hardware, media.

- Logo on site and stage
- Mention at opening and closing
- Swag in the participant bag

What each tier includes

Logo on site and stage, mention at opening and closing	●	●	●
Swag in the participant bag	●	●	●
Recap video, photos, written report	●	●	
Talk at an agentic.tm meetup	●		

How the budget closes

Nokia's \$15,000 is the whole cash budget: credits and prizes. Gold and Silver sponsors add swag, print, photo and video on top, outside this budget.

SPACEX

Confirmed sponsor. Package being finalized, not yet counted above. Whatever it and the credit programs bring lowers the credits line and is reported back to Nokia.

The decision we ask of Nokia: Title Partner at \$15,000, confirmed by 15 October 2026, and one Nokia Challenge brief. Then a one-page agreement and two invoices: \$7,500 on signing in October, \$7,500 in December with the report.

From today to the event

Milestones

WHEN	WHAT
15 Oct	Nokia confirms the Title package and the challenge brief; agreement signed
20 Oct	Site live, registration open, school announcements go out
10 Nov	10 mentors briefed, Nokia Challenge brief final
13 Nov	Registration closes, seats and credits provisioned, tooling tested
27-29 Nov	The event, UPT, Faculty of Automation and Computers, Bd. Vasile Parvan 2, Timisoara
11 Dec	Report, video and showcase to sponsors and press; second invoice

Risks

RISK	RESPONSE
No provider grants credits	The budget already assumes it. Free tiers keep every team building.
Venue falls through	UVT's campus, same weekend. No sponsor money is spent before the booking is signed.
Minors and accounts	Organizers create every seat; no student signs a contract or enters a card. Consent forms, a teacher per school group, medical assistance on site.
Fewer participants	Credits scale with headcount; unspent money is reported and returned.
Cursor's answer slips	Seats are bought at list price either way; a late grant only lowers the cash.
Nokia decides after 15 Oct	The name still goes on the site and T-shirts; only the launch announcement goes out without it.

Next step: Nokia confirms the Title Partner package (\$15,000) and picks one Nokia Challenge brief by 15 October 2026. We send the one-page agreement the same week.

Organizers and partners

UPT hosts the event and houses the participants. UPT and UVT feed them and add faculty mentors and judges. agentic.tm, Timisoara's agentic AI community, runs the program and brings mentors and sponsors. SpaceXAI has confirmed sponsorship.
